## Research & Scholarship

### CURRENT RESEARCH AND SCHOLARLY INTERESTS

My research focuses on imaging cell signaling in the heart. I am developing molecular imaging probes that track to injured heart tissue, such that non-invasive imaging techniques, like cardiac MRI, can visualize these probe signals in real-time. The translational goal of my research is to develop new ways to detect early cardiac injury before permanent damage occurs, so that preventive medical therapy can be started.

### CLINICAL TRIALS

- The PARTNER 3 - Trial - The Safety and Effectiveness of the SAPIEN 3 Transcatheter Heart Valve in Low Risk Patients With Aortic Stenosis, Recruiting
- The PARTNER II Trial: Placement of AoRTic TraNscathetER Valves, Recruiting
- The PARTNER II Trial: S3iCAP, Recruiting
