

Kelly Bugos MS, ANP-BC is an APP Program Manager for the Center for Advanced Practice and a nurse practitioner specializing in cancer survivorship at Stanford Health Care. Ms. Bugos is the program manager of the Advanced Practice Providers (APP) Fellowship Program. Opened in 2016, the Fellowship Program educates and trains newly graduated APPs in transition to professional practice and specialty care, like cancer care. She founded the cancer survivorship clinics at Stanford in 2012 and continues to focus her clinical work on helping people touched by cancer restore their health after treatment. Ms. Bugos has developed other professional roles and programs over her career at Stanford, like the nurse practitioner position in the 1990s. She has expertise in symptom management, complex patient care in the outpatient setting, long term and late effects of cancer and its treatment and advanced nursing practice issues. She is a frequent speaker on these topics at the regional and national level.

Ms. Bugos received her BS in Nursing from the University of Rochester in Rochester, NY and her MS in Oncology Nursing and Adult Nurse Practitioner from the University of California at San Francisco (UCSF). In 2007, she was awarded the BMT Excellence Award for outstanding service within the Stanford BMT Program. She is an active member of the Oncology Nursing Society (ONS) and participates in her local Bay Area Chapter and serves on special interest groups for survivorship and nurse practitioners. She has been a planning committee member for the American Society of Clinical Oncologists and has served as an advisor to numerous community organizations.
