Research and Global Health Activities

Year(s)	Project Information
2013-2018	Title: Stanford-GVK EMRI EMT Refresher Training Program Partner: GVK Emergency Management and Research Institute, India Summary: Created and implemented a modular EMT refresher training program, disseminated to nearly 12,000 EMT's in 17 Indian states. Role: Content creation and educational strategy Funding source: GVK-EMRI
2014-2015	Title: Blended Methods Introductory Emergency Medicine Course Partner: Makerere University, Uganda Summary: Created and implemented a blended methods educational curriculum, focusing on 20 key areas of emergency medicine, made available to a cohort of undergraduate students at both Makerere and Stanford Universities Role: Content creation and on-the-ground implementation Funding source: Stanford University
2014-2018	Title: Pre-Hospital Care Training Course Partner: Nepal Ambulance Service, Nepal Summary: Creation and administration of an initial two-week, basic pre-hospital care provider course, along with intermittent, targeted refresher trainings. Role: Content creation, provider education and evaluation

Funding source: International Medical Corps

- 2014-2019 Title: USAID Quality Health Services Project - Cambodia
Partner: University Research Co. LLC, Cambodia
Summary: Comprehensive health systems strengthening project to improve maternal and child health outcomes.
Role: short and long-term technical assistance focused on implementation of a novel triage system and referral system strengthening updates
Funding source: USAID
- 2014-Current Title: Post-Graduate Emergency Medicine Certificate Course
Partner: Golden Zaneke/Parami Hospital, Myanmar
Summary: Based on local needs assessment, produced an 18-month emergency medicine training course for practicing health care providers currently caring for emergently ill patients.
Role: Content creation, provider education and evaluation, development of online education tools
Funding source: Golden Zaneke
- 2016-Current Title: Pre-Hospital Care Quality Improvement Program
Partner: Nepal Ambulance Service, Nepal
Summary: Establishment of enhanced quality assessment data practices, creation of practice guidelines, and dissemination of guidelines via a mobile application
Role: Guideline creation, mobile application design, provider education, data monitoring, strategic planning
Funding source: Stanford University
- 2016-Current Title: Digital Medical Education International Collaborative (Digital MEDIC)
Partner: Digital MEDIC group, USA
Summary: Creation and sharing of a host of high-quality, interactive, online educational materials with educational institutes around the world.
Role: Emergency medicine content creation, partnership development
Funding source: Unfunded
- 2017-Current Title: Medical Student Emergency Medicine Curriculum Development
Partner: Makerere University College of Health Sciences
Summary: Collaborative production of a blended methods, extra-curricular emergency medicine curriculum, offered to students who currently do not have access to emergency medicine education. A mobile application was created and utilized to improve student access to online materials. We have involved a Stanford Med-Scholar student who is involved in evaluating that educational tools and creating locally tailored video content creation systems to enhance the applicability of locally created online content.
Role: Curriculum design and quality improvement, mobile application implementation, data analysis
Funding source: Unfunded

2018-Current Title: Assessing and Strengthening the Indian Neonatal Care and Referral System
 Partner: Stanford Department of Pediatrics and a number of Indian Public Health Departments and Facilities
 Summary: Systematic assessment of current neonatal care and referral practices in Uttar Pradesh, Gujarat, and Maharashtra with the aim of identifying critical barriers to neonates receiving quality, timely care at an appropriate care facility. These insights are then to be used to guide the creation and implementation of widespread health system strengthening interventions.
 Role: Design of assessment tool, field assessments, program design and implementation
 Funding source: Pending

Educational Grants

Year(s)	Source + Project
2017	Stanford CIGH SEED Grant: Improving Access to Quality Prehospital Emergency Care in Rural Nepal Through the Creation and Implementation of a Prehospital Care Protocol Mobile Application. Amount: \$44,000
