

VITA

Joseph P. Romano

Stanford University

Departments of Statistics and Economics

Sequoia Hall

Stanford, CA 94305

(650) 723-6326

e-mail: romano@stanford.edu

Webpage: profiles.stanford.edu/joseph-romano

Education:

Ph.D., University of California, Berkeley, 1986. Dissertation: On bootstrapping the joint distribution of the location and size of the mode.

M.S., University of California, Berkeley, 1983.

A.B., Princeton University, 1982. Senior Thesis: Counterexamples in probability and statistics. Junior Independent Work: The duality between random convex hulls and random arcs.

Employment:

Professor, Departments of Economics and Statistics, Stanford University.

Joint Professorship 2007–present;

Full Professorship in Statistics, 2000–present;

Associate Professor, Department of Statistics, Stanford University, 1994–2000;

Assistant Professor, Department of Statistics, Stanford University, 1986–1994.

Grants and Awards:

2021 LGBTQ+ Scientist of the Year, awarded by Out to Innovate

National Science Foundation Research Grant entitled: Computer-intensive Inference with Applications to Social Sciences, July 2020–June 2023.

National Science Foundation Research Grant entitled: Randomization inference for contemporary problems in statistics. July 2013–June 2016.

National Science Foundation Research Grant entitled: Multiple Problems in Multiple Testing and Simultaneous Inference, July 2010–June 2013.

National Science Foundation Research Grant entitled: New Methodology for Multiple Testing and Simultaneous Inference, July 2007–June 2010.

National Science Foundation Research Grant entitled: *Theory and Methods for Multiple Testing and Inference*, July 2004 - June 2007.

National Science Foundation Research Grant entitled: *Approximate and Exact Inference Via Computer Intensive Methods*, July 2001 - June 2004.

National Science Foundation Research Grant entitled: *Computer-Intensive Methods for the Statistical Analysis of Dependent Data*, September 1997 - August 2000.

National Science Foundation Research Grant entitled: *Mathematical Sciences: Computer Intensive Methods for the Statistical Analysis of Time Series and Random Fields*, September 1994 - August 1997.

Presidential Young Investigator Award, 1989-1994.

The Canadian Journal of Statistics Award, given to DiCiccio, T. and Romano, J. (1989).
The automatic percentile method: accurate confidence limits in parametric models.
The Canadian Journal of Statistics **17**, 155-169.

National Science Foundation Postdoctoral Fellowship, 1986-1988 (while at Stanford University).

National Science Foundation Graduate Fellowship, 1982-1984.

Graduated Summa Cum Laude in Statistics, Princeton University, 1982.

Collegiate Award of the Northern New Jersey Chapter of the American Statistical Association, 1982.

Phi Beta Kappa Society, 1982.

Ph.D. Dissertations Directed as Primary Advisor:

Leger, Christian. (1988). Use of the bootstrap in an adaptive statistical procedure.

Politis, Dimitris. (1990). A general resampling scheme for time series with weak dependence.

Wolf, Michael. (1996). Subsampling for nonstationary time series with an application to finance.

Chen, Hui. (1996). Bootstrap assisted goodness of fit tests in the frequency domain.

Hochster, Michael. (1998). Adaptive bootstrap L-estimation.

Azeem Shaikh. (2006). Inference for partially identified econometric models.

Armstrong, T. (Coadvised with Han Hong) (2012). Essays on moment inequalities.

EunYi Chung (2013). Asymptotically valid and exact permutation tests.

Tsiang, Michael. (Coadvised with Bala Rajaratnam) (2016). Investigating contemporary questions in climate science from a modern statistical perspective.

DiCiccio, Cyrus. (2018). Hypothesis testing using multiple data splitting.

Served as secondary advisor and dissertation reader for numerous other students. Served as primary advisor to numerous Masters degree students.

Professional Activities:

Elected Fellow of the International Association of Applied Econometrics 2020, Elected Fellow of the Institute of Mathematical Statistics 2000.

Memberships: American Statistical Association

Noether Award Committee (2006–2011, Vice Chairman 2007)

Associate Editor: The Annals of Applied Statistics (2006–2010), The Annals of Statistics (January 2001-2004), The Journal of Statistical Planning and Inference (1996-1999)

Referee for: *Algorithmic Learning Theory*, *Annals of Statistics*, *Annals of Probability*, *Journal of the American Statistical Association*, *Bernoulli*, *Technometrics*, *Biometrika*, *Journal of the Royal Statistical Society*, *Annals of the Institute of Statistical Mathematics*, *Journal of Statistical Computation and Simulation*, *The American Statistician*, *Transactions on Signal Processing*, *The Scandinavian Journal of Statistics*, *The Journal of Nonparametric Statistics*, *The British Journal of Mathematical and Statistical Psychology*, *The Canadian Journal of Statistics*, *Statistica Sinica*, *Journal of Time Series Analysis*, *Statistical Science*, *Proceedings of the American Mathematical Society*, *Econometrica*, *Econometric Theory*, *Journal of Multivariate Analysis*, *International Journal of Biostatistics*, *Statistical Applications in Genetics and Molecular*

Biology, Journal of Econometrics, International Statistical Review, Review of Economic Studies, Journal of Statistical Planning and Inference, Biometrics, British Journal of Mathematical and Statistical Psychology, Journal of the Italian Statistical Society, Psychometrika, Communications in Statistics, Wires Computational Statistics.

Grant Proposal Panel: Served on panel to review National Science Foundation grants, 2004.

Grant Proposal Reviews: National Science Foundation, National Security Agency Mathematical Sciences Program, Natural Science and Engineering Research Council of Canada.

Organizer: *Workshop on Resampling Methods*, September, 1997 at the Centre de recherches mathématiques, University of Montreal.

Chair of Contributed Papers for the Annual Meeting of the Institute of Mathematical Statistics; Park City, Utah; July 1997.

Books:

Romano, J. P. and Siegel, A. F. (1986). *Counterexamples in Probability and Statistics*. Wadsworth Publishing Company, Monterey, CA.

Politis, D., Romano, J. and Wolf, M. (1999). *Subsampling*. Springer-Verlag, New York.

Lehmann, E.L. and Romano, J. (2005). *Testing Statistical Hypotheses*, 3rd edition, Springer-Verlag, New York.

Lehmann, E.L. and Romano, J. (2022). *Testing Statistical Hypotheses*, 4th edition, Springer-Verlag, New York. The 4th edition will be two volumes. The first volume is *Finite-Sample Theory* and the second volume is *Large-Sample Theory*.

116. Ritzwoller, D. and Romano, J. (2022). Detecting the hot hand: Tests of randomness against streaky alternatives in Bernoulli sequences. To appear in *Review of Economic Studies*. (Awarded the editor’s choice featured article.)

Unpublished Reports:

- Bossard, P. and Romano, J. (1982). Monte Carlo results of comparing linear fitting mechanisms when errors are contaminated. Technical Memorandum 82-52221-9, Bell Laboratories, Murray Hill, NJ.
- Romano, J. P. (1986). A note on uniform convergence of the empirical measure with applications to simulation techniques. Technical Report No. 263, Department of Statistics, Stanford University.
- Romano, J. P. (2000). The Pitman estimator is the UMVUE in a location model.
- Romano, J. P. and Wolf, M. (2007). Comment on “Uniform inference in autoregressive models”.

Committees:

- 1986-1987 Ph.D. exam committee, Seminar chairperson.
- 1987-1988 Masters students advising.
- 1988-1989 Curriculum committee, Ph.D. exam committee.
- 1989-1990 Ph.D. student selection, Masters students advising.
- 1990-1991 Ph.D. exam committee, Affirmative action.

1991-1992 Masters students advising, Ph.D. exam committee.

1992-1993 Ph.D. students advising.

1993-1994 Ph.D. exam committee.

1994-1995 Ph.D. advisor to first year students, Qualifying Exam.

1995-1996 Advisor to Ph.D. students without thesis advisors, Search Committee.

1996-1997 Ph.D. advisor to first and second year Ph.D. students.

1997-1998 Ph.D. advisor to first and second year Ph.D. students, Chair of Student Selection Committee.

1998-1999 Ph.D. advisor to first and second year Ph.D. students, Chair of Qualifying Exam Committee.

1999-2000 Ph.D. advisor to first and second year Ph.D. students.

2000-2001 Chair of Qualifying Exam Committee, Served on the Judicial Panel.

2001-2002 Ph.D. program Committee, Chair of the Qualifying Exam Committee.

2002-2004 Advisor to all students in the Master's Degree and Ph.D. Minor programs.

2004-2005 Advisor to all students in the Master's Degree and Ph.D. Minor programs. Chair of Qualifying Exam Committee.

2005-2006 Master's Degree Advisor, Ph.D. admissions.

2006-2007 Master's Degree Advisor, Committee on Faculty Affairs.

2007-2008 Vice Chairman of the Department of Statistics, Chair of Committee on Faculty Affairs.

2008-2009 Faculty Affairs Committee, Advisor to Master's Degree Students.

2009-2010 Advisor to Master's Degree Students.

2010-2011 Chair of Qualifying Exams

2011-2012 Ph.D. Admissions

2012-2013 Master's Advisor, Chair of Qualifying Exams

2013-2014 Associate Chairman

2014-2015 Chair of Committee on Faculty Affairs

2015-2016 Ph.D. Admissions

2016-2017 Chair of Qualifying Exams

2017-2018 Master's Advisor

2018-2019 Chair of Ph.D. Admissions

2019-2020 Qualifying Exams

2020-2023. Director of Graduate Studies

Select Technical Addresses:

Correct inference via permutation and randomization tests, U.C. Irvine Department of Economics, November 2018.

Approximate randomization tests, U.C. Riverside, January 2017.

Exact and approximate permutation Tests: U.C. Riverside, May 2016

Permutation Tests 101: Rutgers University, September 2015.

Two-sample permutation tests: European University Institute in Florence, Italy, December 2014

Multivariate and Multiple Permutation Tests: Invited Lecture at 7th International Conference of the ERCIM WG on Computational and Methodological Statistics, Pisa, Italy, December 2014.

Permutation Tests: New Jersey Institute of Technology, Department of Mathematics, October, 2014.

Permutation and Resampling Tests: U.C. San Diego, Department of Mathematics, October 2013.

Permutation Tests 101. University of Chicago, Department of Economics, April 2013.

Generalized error control in multiple testing via subsampling and resampling. Invited lecture at Econometric Society North American Winter Meetings, New Orleans, January 2008.

Generalized error control in multiple testing. Invited lecture at MCP V, Vienna. July 2007.

Concepts and methodology in multiple testing. Columbia University, September 2006.

Error control and optimality in multiple testing. Columbia University, April 2006.

Resampling based error control in multiple testing. Rutgers University, March 2006.

Generalized error control in multiple testing. University of New Mexico, February 20, 2006.

Generalized error control of stepwise methods in multiple testing. U.C. Santa Barbara, November 2, 2005.

Three lectures on multiple testing: optimality and generalized error control of stepwise methods. Distinguished Lecture Series, U.C. San Diego, May 2–6, 2005.

Optimality and error control of stepwise methods in multiple testing. Invited lecture, U.C. Berkeley Department of Biostatistics, October, 2004.

Error control of stepwise methods in multiple testing. Invited lecture, U.C. Davis Department of Statistics, September 2004.

Optimality of stepwise tests and a general resampling construction. Invited lecture and The Second Erich L. Lehmann Symposium, Rice University, May 2004.

Finite Sample Nonparametric Inference. Special invited speaker XXV Congreso Seio, Vigo, Spain, March 2000.

Subsampling in some hard problems. Universidad Carlos III, Madrid, March 2000.

Finite Sample Nonparametrics and Large Sample Efficiency. May, 1998. Rutgers Bootstrap Conference, New Brunswick, NJ.

Subsampling with unknown rates of convergence. September, 1997. Centre de recherches mathématiques, Montreal.

Asymptotics of Subsampling. August, 1996. Department of Statistics, Rutgers University.

Resampling and Subsampling for Time Series Models. A series of lectures presented in spring, 1996. Department of Mathematics, University of California, San Diego.

Estimating the distribution of a studentized statistic by subsampling. August, 1993. 49th Session of the International Statistical Institute, Firenze.

Resampling methods for dependent data. August, 1993. Special Contributed Paper, Joint Statistical Meetings, San Francisco, CA.

Uniform confidence bands for the spectrum based on subsamples. April, 1993. 25th Symposium on the Interface , San Diego, CA.

A general theory for the construction of large sample confidence regions. May, 1993. U.C. Berkeley Department of Statistics Colloquium Series.

Limit theorems for Hilbert space valued random variables with application to the stationary bootstrap. August, 1992. Joint Statistical Meeting. Boston, MA.

Bootstrapping time series. May, 1992. Bell Laboratories, Murray Hill, NJ.

The stationary bootstrap. May, 1992. University of Montreal Department of Operations Research and Computer Science Seminar Series.

Nonparametric resampling procedures for problems in time series. August, 1990. Invited Lecture, 2nd World Congress of the Bernoulli Society for Mathematical Statistics and 53rd Annual Meeting of the Institute of Mathematical Statistics, Uppsala, Sweden.

Bootstrap and randomization tests. October, 1990. University of Chicago Department of Statistics Seminar Series.

Bootstrap choice of tuning parameters. December, 1989. Invited participant, Asymptotic methods for computer-intensive procedures in statistics, Oberwolfach, Germany.

Bootstrap construction of hypothesis tests. November, 1989. University of North Carolina Department of Statistics Seminar Series.

The automatic percentile method. January, 1988. U.C. Berkeley, Department of Statistics Colloquium Series.

Bootstrapping functionals of a density. November, 1987. U.C. Davis Department of Statistics Seminar series.

A bootstrap revival of some nonparametric tests. April, 1986. U.C. Berkeley Neyman Seminar.

Bootstrapping the mode. January, 1986. Bell Laboratories, Murray Hill, NJ.
