

Dr. Mindie H. Nguyen is Professor of Medicine, and by courtesy, Professor of Epidemiology and Population Health, Director for the Hepatology Fellowship, Director for the Hepatology Clerkship, a Member of the Appointment and Promotion Committee, and a Diversity Advisor for the Department of Medicine at Stanford University Medical Center (<https://profiles.stanford.edu/mindie-nguyen>). She is an active clinician and researcher performing clinical trials, clinical epidemiology and real-world studies in viral hepatitis, NAFLD, cirrhosis and liver cancer with over 250 original research publications including first or senior authorship in *The New England Journal of Medicine*, *JAMA Network*, *Lancet Gastroenterology and Hepatology*, *Gastroenterology*, *Journal of Hepatology*, and *Hepatology*. She has served as editorial/advisory board member for major journals such as *Lancet Gastroenterology and Hepatology*, *Gastroenterology*, and *Hepatology*. She has also served as Chair of the Hepatitis B SIG for the American Association for the Study of Liver Diseases (AASLD), Officer for the International Association for the Study of Liver Disease (IASL), and is active in global health as a Faculty Fellow at the Stanford Center for Innovation in Global Health. She sees general liver patients and transplant patients three full days a week. She is also an active educator and has mentored over 130 trainees from high-school students to undergraduate, medical, Masters/PhD students in Public Health/Epidemiology, clinical residents/fellows, postdoctoral research fellows, overseas visiting scholars, and faculty at Assistant/Associate Professor rank (<https://med.stanford.edu/nguyenlab>). The *Professor Mindie H. Nguyen Award for Outstanding Clinical Research by Early Career Investigators* by the AASLD honors Dr. Mindie H. Nguyen in recognition of her mentorship of several generations of students and trainees, and for her research on liver cancer in understudied populations. The goal of the award (4 per year) is to encourage clinical hepatology research in viral hepatitis, fatty liver disease, or hepatocellular carcinoma by early career investigators in the Africa, Southeast Asia, and Western Pacific regions (www.aasldfoundation.org/awards-programs).
