

PHILIP C. HANAWALT
Curriculum Vitae
 October 2019

I. Education

Deep Springs College, CA.....	Liberal arts.....	1949-50
Oberlin College, OH	B.A. 1954.....	Physics major..... 1950-54
Yale University, CT	M.S. 1955	Physics..... 1954-55
Yale University, CT	Ph.D. 1959	Biophysics..... 1955-58
University of Copenhagen, Denmark	Postdoctoral.....	Bacterial Physiology..... 1958-60
Calif. Inst. Technology, Pasadena, CA	Postdoctoral.....	Molecular Biology & Genetics.. .. 1960-61

II. Appointments – All at Stanford University, CA

Research Biophysicist and Lecturer, Biophysics Laboratory and Graduate Program.....	1961-65
Associate Professor of Biology, Department of Biological Sciences.....	1965-70
Director, Biophysics Graduate Program.....	1968-85
Director of Graduate Studies in Biology	1969-72; 1990-93
Professor of Biology.....	1970-2017
Program Director, Cell & Molecular Biology Graduate Training Program	1973-84
Member, Medical Scientist Training Program Committee, School of Medicine.....	1975-80
Member, Advisory Committee on Engineering in Biology and Medicine	1976-79
Member, Task Force on Biohazards	1977-79
Chair, Administrative Panel on Radiological Hazards	1978-80
Member, Committee on Cancer Biology	1978-81
Faculty Member, Graduate Program in Cancer Biology	until 2017
Faculty Member, Biophysics Graduate Program	until 2017
Professor of Dermatology (Joint appointment), School of Medicine.....	1979-2017
Member, Committee on Research.....	1981-84
Chair, Department of Biological Sciences.....	1982-89
Chair, Second Senate <i>ad hoc</i> Committee on the Professoriate.....	1988-90
Member, Program in Molecular and Genetic Medicine	1989- ?
Member, 23rd Senate of the Academic Council	1990-92
Member, Advisory Committee for Medical Free Electron Laser Center	1991-93
Member, School Planning Group, School of Humanities and Sciences.....	1991-93
Member, Faculty Council, School of Humanities and Sciences	1992-94
Faculty Member, Graduate Training Program in Biotechnology	1994- ?
Howard H. and Jessie T. Watkins University Professor at Stanford.....	1997-02
Member, Stanford Comprehensive Cancer Center	2006-17
The Dr. Morris Herzstein Professorship in Biology.....	2009-17

III. Government Service and Advisory Committees

Physiological Chemistry Study Section, National Institutes of Health (NIH).....	1966-70
Chair, U.S. National Committee, International Union of Pure and Applied Biophysics (IUPAB),	1969-75
Advisory Committee on Nucleic Acids and Protein Synthesis, American Cancer Society	1972-76
IUPAB Commission on Education and Development in Biophysics.....	1975-80
Advisory Committee to Bruce Ames, Environmental Health Sci. Ctr., Univ. California, Berkeley	1976-83
Chair, “Molecular Effects: Interactions with Chemicals and Viruses”, Conference on Federal Strategy for Research into Biological Effects of Ionizing Radiation.....	1979-80
Advisory Committee on Low Dose Radiation Program for National Cancer Institute, USPHS.....	1980
Workshop on “Mechanisms of Toxicity and Carcinogenicity” for Congressional Task Force on Environmental Cancer and Heart and Lung Disease.....	1981
Chemical Pathology Study Section, National Institutes of Health (NIH).....	1981-84
Scientific Advisory Board, Univ. Tx. Cancer Center, Science Park, Smithville (Chair 1988-90)	1984-90
Pre-doctoral Fellowship Review Panel, National Science Foundation.....	1985

Board of Scientific Counselors, Division of Biometry and Risk Assessment, NIEHS	1987-90
Visiting Committee, Department of Biology, Brookhaven National Laboratory, (Chair, 1992).....	1987-92
Chair, Advisory Committee, Center for Environmental Health Sciences, MIT.....	1988-92
Outside Review Committee, NASA Center for Research and Training in Radiation Health Lawrence Berkeley Laboratory & Colorado State University	1991-96
Advisory Committee on Biosciences and Biotechnology, Los Alamos National Laboratory, NM	1993-95
Special Review Committee, National Cancer Institute, NIH.	1993
Scientific Advisory Board, Xenometrix Inc., Boulder, Colorado	1993-98
Chair, External Advisory Board, Environmental Health Sciences Center, Sealy Center for Molecular Science, University of Texas Medical Branch, Galveston.....	1994-97
Outside Review Committee, Lawrence Berkeley Laboratory, University of California	1994
Scientific Advisory Board, Office of Environmental Health Hazard Assessment, California EPA	1994-98
External Advisory Committee, City of Hope Cancer Research Center, Duarte, CA	1995-07
Toxicology Advisory Committee, The Burroughs-Wellcome Fund (Chair 1997-00)	1995-04
Scientific Advisory Board, Fogarty International Center, NIH	1995-99
Board on Radiation Effects Research, NAS/NRC Commission on Life Sciences	1995-98
Consultant, Wireless Technology Research, Ontario, Canada	1996
External Review Working Group, National Institute of Environmental Health Sciences, NIH	1996-98
MRC Molecular/Cellular Medicine Board, Review of Cell Mutation Unit, Brighton, UK.....	1996
Outside Evaluation Committee, Medical Genetics Center, Southwest Netherlands	1996
NRC Committee on Health Risks of Low Levels of Ionizing Radiation, BEIR VII Phase I	1997-98
Council for Extramural Grants, American Cancer Society	1998-01
Board of Trustees, Oberlin College (Chair, Committee on Academic Affairs)	1998-07
External Advisory Board, Prog. on Structural Biology of DNA Repair (SBDR) Berkeley, CA	2001-
External Visiting Committee, Department of Biological Sciences, Univ. Southern CA	2001
External site visit committee, National Institute on Child Health and Development, NIH	2001; 06
External review committee, Director of NIEHS	2001
Genetics Study Section Boundaries Team, Center for Scientific Review, NIH	2002
Abbott-ASM Lifetime Achievement Award Selection Committee, American Acad. Microbiology	2003-06
External Advisory Com. MD Anderson Cancer Ctr, TX, Prog. on Processing Complex Lesions	2004-07
Consultant, Achaogen Inc, South San Francisco, CA	2005
International Advisory Board, Chulabhorn Research Institute, Bangkok, Thailand	2005-10
Special Conferences Committee, American Association for Cancer Research	2005-10
Working Group, Integrated Translational Research on DNA Repair (NIEHS)	2006
Intramural site visiting committee member, National Cancer Institute, NIH.....	2009
External Examiner, Biotech. Prog., Universiti Tunku Abdul Rahman, Kuala Lumpur, Malaysia.....	2010-13
External Reviewer for Cancer Research UK (Quinquennial Review)	2010
Associate Editor, <i>DNA Repair</i> , to organize annual special issues on "Cutting-Edge Perspectives"	2013-20

IV Editorial Service

Co-Founding Editor & Managing Editor: <i>DNA Repair Reports (Mut.Res.)</i>, Now: <i>DNA Repair</i>	1982-93
Board of Reviewing Editors: <i>Science</i>	1995-01
Senior Editor: <i>Cancer Research</i>	2003-10
Editorial Board: <i>Proceedings of the National Academy of Sciences, U.S.A.</i> (since 2003)	Current
Assoc. Editor: <i>DNA Repair, Special Issues, "Cutting Edge Perspectives in Genomic Maintenance"</i>	2013-19
Editorial Board: <i>Mechanisms of Ageing and Development; Aging</i>	retired
Editorial Board: <i>Cancer Research 1984-87; Gene Expression 1990-94; Environ.Molec.Mutagenesis</i>	1994-97
Editorial Board: <i>Biotechniques</i> (-2006); <i>Genes and Environment</i> (Japanese EMS)	retired
Associate Editor: <i>Environmental Health Perspectives</i> (-2008) <i>Molecular Carcinogenesis</i>	retired
Honorary Editorial Boards: <i>Libertas Academica; Translational OncoGenomics</i>	current

V. Professional Recognition and Awards

Honorable Mention, 8th Westinghouse National Science Talent Search	1949
Merit Membership Award, Michigan Academy of Science, Arts and Letters	1949
(for attaining one of highest scores of Michigan physics students in National Science Talent Search)	
District Champion in Oratory, Michigan High School Forensic Association Contest	1949
Postdoctoral Research Fellowship, National Institutes of Health	1958-59

Postdoctoral Research Fellowship, American Cancer Society.....	1960
Elected Fellow, American Association for Advancement of Science.....	1981
Inaugural Annual Lecture, Lord Dowding Fund for Humane Research, London	1982
Spanish Academy of Science & Catalan Society for Biology Lectureship, Barcelona	1982
Annual Lectureship, "Frontiers in Biology," Case-Western Reserve University, Cleveland	1986
Outstanding Investigator Research Award, National Cancer Institute, NIH.....	1987-1994; 1994-2001
Elected Member, National Academy of Sciences, U.S.A.....	1989
Distinguished Lecturer of NIEHS, 6th Annual H. L. Falk Memorial Lecture.....	1990
Excellence in Teaching Award, Northern California Chapter, Phi Beta Kappa.....	1991
Annual Award for Excellence in Basic Science, Environmental Mutagen Society (EMS).....	1992
Peter and Helen Bing Award for Distinguished Teaching, Stanford University.....	1992
Elected Fellow, American Academy of Microbiology.....	1993
Fogarty Senior International Fellowship, at the Imperial Cancer Research Fund Labs, U.K.....	1993
President, Environmental Mutagen Society	1994
Annual Research Award, American Society for Photobiology.....	1996
Second Severo Ochoa Memorial Honors Lecture, New York University.....	1996
Chair, Gordon Research Conference on "Mutagenesis"	1996
Honorary Doctor of Science, Oberlin College, Ohio.....	1997
International Mutation Research Award for Excellence in Scientific Achievement	1997
Princess Takamatsu Cancer Foundation Lectureship; Tokyo, Sendai & Kumamoto, Japan	1999
Partab Varandani Memorial Lecture, Wright State University, Ohio	1999
Chair, Gordon Research Conference on "Mammalian DNA Repair"	1999
Inaugural John Abelson Family Lecture, Washington State University, Pullman, WA.....	2000
Senior Scholar Research Award, Ellison Medical Foundation	2001-05
Student Mentoring Award, Environmental Mutagen Society	2001
Elected Foreign Associate, European Molecular Biology Organization (EMBO)	2001
Elected Honorary Member, German DNA Repair Network.....	2002
John B. Little Award in Radiation Health Sciences, Harvard University School of Public Health	2002
Sonneborn Lecture, Indiana University	2002
Rothschild-Yvette Mayent-Institut Curie Award and Lectureship, Paris, France.....	2003
Keynote Lecture, ASM International Conference on DNA Repair and Mutagenesis, Bermuda.....	2004
President/Organizer, 9thth International Conference on Environmental Mutagens, San Francisco.....	2005
Special Issue Mutation Research V.577 "Mechanisms of DNA Repair" dedicated to P.C.Hanawalt	2005
Doctor Honoris Causa, University of Bio Bio, Concepcion, Chile	2006
Centennial Lecture, AACR 99th Annual Meeting , Los Angeles.....	2007
Honorary Trustee of Oberlin College, Ohio.....	2007-
Visiting Research Scholar, Frontier Biosciences Graduate School, Osaka University, Japan.....	2007
Second Lawrence Grossman Lecture, Johns Hopkins University, Bloomberg School of Public Health....	2008
Elected Fellow, American Academy of Arts and Sciences (AAAS).....	2008
Doctor Honoris Causa, University of Seville, Spain.....	2008
Appointed to The Dr. Morris Herzstein Professorship in Biology at Stanford University... ..	2009-17
Keynote Lecture, 10th International Conference on Environmental Mutagens, Florence, Italy.....	2009
Three publications selected for Journal of Biological Chemistry Centennial "Classics Series"	2010
AACR - Princess Takamatsu Lectureship Award, presented in Orlando, Florida	2011
Keynote Lecture, 3rd Erling Seeberg Symposium on DNA Repair, Trondheim & Ørland, Norway	2012
Doctor Honoris Causa, University of Buenos Aires, Argentina	2012
Plenary Lecture, 11th Int. Conf. on Environmental Mutagens, Foz du Iguassu, Brazil	2013
Chair, Gordon Research Conference on "DNA Damage, Mutation and Cancer", Ventura, CA	2014
Medal for Faculty Excellence Fostering Undergraduate Research at Stanford University	2014
Appointed to Fulbright Specialist Roster, Council for International Exchange of Scholars (CIES)	2014
Keynote Lecture in Opening Session, 16th Int. Congress on Photobiology, Cordoba, Argentina	2014
Doctor Honoris Causa, National University of El Litoral, Santa Fe, Argentina	2014
Wilbur Cross Medal, Yale University Graduate School Alumni Association	2015
Doctor Honoris Causa, Universidad Mayor de San Andres, La Paz, Bolivia	2015
Keynote Lecture, Gordon Conference on "DNA Damage, Mutation and Cancer", Ventura, CA.....	2016
Keynote Lecture, Toxicology Division, American Chemical Society National Mtg., Philadelphia, PA	2016
Keynote Lecture, ALAMCTA Congress, Montevideo, Uruguay	2016
ALAMCTA Award for discovery of DNA repair pathways and mechanisms, Montevideo, Uruguay.....	2016
Invited presentation, Cold Spring Harbor Mtg. on "Mechanisms of Eukaryotic Transcription"	2017
Closing Keynote lecture, 6thth Europe-U.S. DNA Repair Conference, Udine, Italy	2017

VI. Professional Societies

American Academy of Arts and Sciences (Elected Fellow)	2008
American Association for Advancement of Science (Elected Fellow),	1981
American Association for Cancer Research (AACR)	
Program Committee: Chair, Biochemistry Section	1990
Special Conferences Committee	1991-94: 2005-'08
Board of Directors	1994-97
Chair, <i>Ad Hoc</i> Committee on Research Integrity and Ethics	1994
American Society for Biochemistry and Molecular Biology (ASBMB)	1965
American Chemical Society	1990
American Society for Microbiology (Elected ASM Fellow)	1993
American Society for Photobiology, Charter Member,	1972
Biophysical Society, Charter Member,	1957
Executive Board	1969-71
Program Chair for Annual Meeting, Nominee for president	1971
Environmental Mutagen Society (Now: Environmental Mutagenesis and Genomics Society)	1987
Chair, Future Directions Committee	1990-92
Program Chair/President	1993-94
Council Member, and Member of Executive Board	several terms
Chair, Alexander Hollaender Outreach Committee	2011-14
European Molecular Biology Organization (EMBO), Elected Associate Member	2001
Genetics Society of America	
National Academy of Sciences of the United States of America, Elected Member	1989
Radiation Research Society	
Sigma Xi	

VII. Scientific Conferences Organized

Biophysical Society Annual Meeting, New Orleans, Louisiana (Program Chair)	1971
First International Workshop on "Molecular Mechanisms for DNA Repair", Squaw Valley, CA (ICN-UCLA conference) (Organizer and Program Chair)	1974
DNA Replication and its Regulation, Squaw Valley, (ICN-UCLA), CA. (Co-chair with M. Goulian)	1975
DNA Repair Mechanisms, Keystone Symposium, Colorado (Co-chair with E. C. Friedberg)	1978
Chemical Carcinogenesis and Oncogenes, Chemical Pathology Study Section Workshop, Steamboat Springs, Colorado (Co-organizer)	1984
Introduction and Expression of Genes in Eukaryotes, Biology Affiliates Symp., Stanford (Organizer)	1985
Mechanisms and Consequences of DNA Damage Processing, Keystone Symposium, Taos, NM (Co-chair with E. C. Friedberg)	1988
Genomic Instability and Cancer, Keystone Symposium, Tamarron, Colorado (Co-chair with Curt Harris and Janet Rowley)	1991
Cellular Responses to Environmental DNA Damage, AACR Special Conference in Honor of Richard Setlow, Banff, Alberta, Canada (Co-chair with M. Paterson)	1991
Environmental Mutagen Society Annual Meeting, Norfolk, Virginia (Program Chair)	1993
Risk Assessment in Environmental Carcinogenesis, AACR/EMS Special Conference, Whistler Resort, British Columbia, Canada (Co-chair with James Swenberg)	1994
Gordon Conference on Mutagenesis, Plymouth, New Hampshire (Vice Chair, 1994) Chair	1996
Gordon Conference on Mammalian DNA Repair, Ventura, California (Vice Chair, 1997) Chair	1999
Panel on "DNA repair in the CNS", Winter Conf. on Brain Research, Breckenridge, CO (Chair)	2000
9th International Conference on Environmental Mutagens, San Francisco (President/Organizer)	2005
Gordon Conference on DNA Damage, Mutation and Cancer, Ventura, CA (Vice Chair, 2012), Chair	2014

VIII. Teaching

Twenty-nine graduate students have completed Ph.D. dissertations in Hanawalt's laboratory; several M.S. students and 42 undergraduates have completed research theses for graduation with Honors; over 60 postdoctoral fellows and visiting senior scientists have contributed to Hanawalt's research program at Stanford since 1962. (Complete list of names and current affiliations are provided on Hanawalt's Web Site.) Hanawalt's group has maintained an international flavor, with participants from over 36 different countries.

Courses taught at Stanford University (1964 through 2017).

Maintenance of the Genome, Freshman Seminar (BioSci 26N)
DNA Replication and Genomic Maintenance, upper division & graduate course (BioSci 110/210)
Molecular Biophysics, graduate level lecture course (BioPhys 250) (initiated this course in 1965)
DNA Repair and Genomic Stability, graduate lecture course (BioSci 205)
DNA Replication, upper division seminar course (BioSci 134)
Highlights in Photobiology, graduate & upper division lecture course
Molecular Biology, undergraduate core lecture course (Course Director/lecturer for 7 years) (Bio 21)
Cell Physiology, undergraduate core lecture course, (taught with Prof. Arthur Giese for 4 years)
Research Seminar on DNA Repair and Genetic Toxicology (BioSci 305)
Visiting Prof., Deep Springs College, CA. "DNA replication and Genomic Maintenance" Aut. 2009
Fulbright Specialist Grant to teach course in "Genomic Maintenance", Santa Fe, Argentina 2014
Fulbright Specialist Grant to teach in Hollaender Course in "Genetic Toxicology", La Paz, Bolivia 2015
Lecturer, Hollaender Course on "Nutrition, Health & Environment", Buenos Aires, Argentina 2016

IX. Principal Research Accomplishments

As a graduate student at Yale, Hanawalt initiated the studies in the laboratory of R. B. Setlow to quantitatively assess the inhibitory effect of ultraviolet light (UV) on DNA synthesis in *E. coli*, and to conclude that "recovery mechanisms can eventually restore the DNA synthesis". He also showed that the lag in recovery of DNA synthesis could be shortened by photoreactivation, implicating the removal of obstructions to replication. That work led some years later to his discovery of repair replication, which together with the reports of damage removal in the laboratories of Setlow and Paul Howard-Flanders, constituted the discovery of the ubiquitous pathway of DNA excision-repair. During his postdoctoral apprenticeship (with O. Maaløe) he discovered that protein and RNA synthesis are required to initiate the bacterial DNA replication cycle. That work contributed to formulation of the "replicon" concept in the early 1960s and it provided a widely used procedure for synchronizing DNA replication cycles.

Hanawalt has been a productive researcher in the field of DNA repair since his pioneering report of repair replication in 1963. He also first demonstrated repair replication in mycoplasmata and in a eukaryote, (*Tetrahymena pyriformis*), and he developed a number of experimental approaches for studying DNA repair, beginning with the BrdUrd density labeling method for resolving semiconservatively replicated DNA from parental DNA containing repair patches; enabling determination of patch lengths. Hanawalt's approach was employed by James Cleaver in 1968 to document a DNA repair defect in xeroderma pigmentosum (XP), the first example of a cancer prone human disease due to a deficiency in DNA repair. The method was also used to validate the phenomenon of unscheduled DNA synthesis as a measure of repair. Other significant research contributions from Hanawalt's laboratory in early years included: demonstration of preferential mutagenesis by N-methyl nitrosoguanidine at DNA replication forks and its application to physical mapping of genes in *E. coli*; early evidence for membrane association of DNA replication complexes in *E. coli* and in human cells; discovery of long-patch excision-repair in *E. coli* and the demonstration that it is an inducible component of the RecA-LexA (SOS) regulatory circuit; discovery of a gene controlling nucleoside uptake in *E. coli*; development of permeabilized bacterial and mammalian cell systems to study excision-repair pathways by complementation analysis; demonstration of enhanced survival of UV-irradiated Simian Virus 40 upon treating the host cells with low doses of UV or chemical carcinogens (evidence for inducible repair in human cells); discovery that the repair enzyme, T4 endonuclease V, operates processively on damaged DNA; discovery that certain types of damage in transfecting plasmid DNA markedly enhance the efficiency of stable transformation in human cells; and the discovery that UV irradiation of short sequences of nucleotides can result in their ligation through pyrimidine dimerization, to provide a plausible mechanism for pre-biotic assembly of high molecular weight duplex nucleic acids.

In 1982 Hanawalt and his colleagues reported the first example of intragenomic heterogeneity of DNA repair in mammalian cells. Then they discovered that repair of some types of damage is selective; active genes are preferentially repaired; they discovered the dedicated repair pathway, termed transcription-coupled repair (TCR), which removes transcription-blocking lesions from the transcribed strands of expressed genes. Hanawalt and his students documented TCR in mammalian cells, in *E. coli*, and in yeast chromosomal and plasmid-borne genes. The discovery of TCR in Hanawalt's laboratory has profound implications for the fields of mutagenesis, environmental carcinogenesis, aging, and risk

assessment. The mutation profiles in cells from tumors reveal a predictable strand bias, superimposed upon the mutagenic signature from the likely causal agent.

The prototype *recQ* gene was discovered in *E. coli* by Hiroaki Nakayama in Hanawalt's laboratory, and we now know of five homologues in humans including the genes mutated in the cancer prone hereditary diseases: Bloom's syndrome, Werner's syndrome, Rothman Thompson syndrome, and RecQ1, which has been implicated in cancer cell migration and invasion. In *E. coli* the RecQ helicase was shown by Justin Courcelle in Hanawalt's laboratory to play an important role in the accurate recovery of arrested replication forks, as it participates in selective degradation of the nascent lagging strand, facilitating fork regression and repair of the blocking lesion. RecQ also provides a key to understanding the classic phenomenon of *thymineless death*, by which the gene was originally identified. Hanawalt has participated in more recent collaborative studies to document selective degradation of DNA from the chromosomal origin during thymine starvation.

Some more recent studies have focused upon the regulation of TCR and the global genomic nucleotide excision repair (GGR) pathways. Features of the TCR pathway (defective in Cockayne syndrome) include the possibility of "gratuitous TCR" at transcription arrest sites in undamaged DNA. The GGR pathway was shown to be controlled through the SOS genomic stress response in *E. coli* and through the activated product of the *p53* tumor suppressor gene in human cells. It was shown that these regulatory systems particularly affect the repair efficiency of the predominant UV-induced photoproduct, the cyclobutane pyrimidine dimer, as well as that of chemical carcinogen DNA adducts, such as benzo(a)pyrene diol-epoxide and benzo(g)chrysene. Rodent cells (typically deficient in the *p53*-controlled GGR pathway) and tumor virus infected human cells (in which *p53* function is abrogated) were shown to be unable to carry out efficient GGR of some lesions. These findings limit the utility of such systems for quantitative risk assessment.

Thierry Nospikel and Hanawalt reported that attenuated efficiency of GGR in terminally differentiated human cells is a consequence of reduced activity of the E1 ubiquitin-activating enzyme. Thus, E1 controls excision repair, and may operate as a "master switch" to regulate classes of genes during terminal differentiation. This has profound implications for our understanding of DNA repair regulation, and the possibility of modulating the repair response in tumors of patients undergoing chemotherapy.

An area of current research interest is the molecular basis of the DNA repair defects in patients with Cockayne syndrome (CS) and UV-sensitive syndrome (UVSS). Although these patients are sun sensitive, unlike XP, they do not develop cancers of *any type*. Graciela Spivak in Hanawalt's group has shown that although both CS and UVSS cells are deficient in TCR of UV-induced DNA damage, CS appears to be additionally defective in the processing of oxidative DNA damage. The severe developmental and neurological problems in CS might be a consequence of defective processing of endogenous oxidative DNA lesions. An ultrasensitive assay for repair of the prominent oxidative base lesion, 8oxoGuanine (at physiological levels ~100-fold lower than typically studied) was recently developed, termed "comet-FISH" by which a postdoc, Jia Guo, along with Spivak and Hanawalt have shown that CS and UVSS cells are equally deficient in TCR of this important lesion.

Another current research effort focuses upon naturally-occurring non-canonical DNA structures as encumbrances to transcription. A novel method for cancer chemotherapy employing peptide nucleic acid (PNA) for generating a stable R-loop (RNA-DNA hybrid) in a uniquely expressed gene in selected tumor cells is being developed to render the very act of transcription toxic in these cells.

X. Selected Publications from Hanawalt's laboratory, from 502 total

Hanawalt PC "Use of Phosphorus-32 in Microassay for Nucleic Acid Synthesis in *E. coli*" *Science* 130:386-387 (1959) **First Publication.**

XI. Invited Lectures (2004 – present)

February 2004 Keynote Lecture: 4th Intl. Conf. On Unstable Microsatellites and Human Disease, Banff Centre, Alberta, Canada

April 2004 Seminar: UCLA, Molecular Toxicology, Los Angeles, CA

May 2004 Seminars: Texas A&M Univ., MD Anderson Cancer Ctr., Houston; and Science Park
May 2004 Speaker: Conf. on Cockayne syndrome and related disorders, Natl. Conf. Ctr, VA
June 2004 Speaker: U.S.- Japan DNA repair meeting, Hawaii
June 2004 Symposium organizer/speaker: 14th Int. Cong. Photobiology, Jeju, Korea
August 2004 Discussion Leader, Burroughs-Wellcome Fund Summer Conference on "Coexistence and Collisions at the host/microbe interface", Clearwater Beach, Florida
August 2004 Plenary Lecture, 5th Princess Chulabhorn Int. Science Congress "Evolving Genetics and its Global Impact" Bangkok, Thailand
September 2004 Plenary Lecture, Mtg. on Germ Cell Mutagenesis, Bar Harbor, Maine
November 2004 Keynote Address, ASM Conference on "DNA Repair and Mutagenesis: From Molecular Structure to Biological Consequences," Southampton, Bermuda
May 2005 Educational Lecture, American Society for Clinical Oncology (ASCO) Annual Mtg, Orlando, FL
September 2005 Keynote Lecture, 9th Int. Conference on Environmental Mutagens, San Francisco
Lecturer, CMB/Genetics Short Course, Radiation Oncology, Univ. Michigan, Ann Arbor
October 2005 Keynote Lecture, VI Latin American Congress on Environmental. Mutagenesis, Carcinogenesis and Teratogenesis, Mendoza, Argentina
Nov-Dec 2005 Plenary Lecture/Session Chair, 2nd EU-US DNA Repair Mtg, Erice, Sicily
March 2006 Session Chair/ Discussion Leader, Gordon Conference on "DNA damage mutagenesis and cancer", Ventura, CA.
April 2006 Chair of Opening Session, "DNA repair: from molecular mechanism to human disease" (Noordwijkerhout, The Netherlands
May 2006 Plenary Lecture, Memorial Symposium on DNA Repair (in honor of Erling Seeberg), Lofoten Islands, Norway
October 2006 Short Course: "DNA Repair and Genomic Maintenance", Montevideo, Uruguay
October 2006 Lectures in an Alexander Hollaender Course on Environmental Mutagenesis and DNA Repair, University of Bio Bio, Concepcion, Chile
November 2006 Keynote Lecture for Japanese Environmental Mutagen Society Annual Meeting, Sakai, Japan: followed by seminars in Osaka and Sendai.
February 2007 Session chair and speaker, Gordon Conference on Mammalian DNA Repair, Ventura, CA
April 2007 Centennial Lecture, AACR Annual Meeting, Los Angeles, CA
July 2007 Seminar, Dept Biochemistry, Baylor University, Houston, TX
September 2007 Symposium lecture, Oregon Health Sciences University, Portland, Oregon
October 2007 Symposium lecture, Kyushu University, Fukuoka, Japan
November 2007 Lecture series, Graduate School of Frontier Biosciences, Osaka University, Japan
2007 Plenary Lecture, Princess Chulabhorn Science Congress, Bangkok, Thailand
January 2008 Second Lawrence Grossman Lecture, Johns Hopkins University, Baltimore
Seminar, Molecular Gerontology Dept., National Institute on Aging , Baltimore
June 2008 Session Chair, 2nd Intl. Genome Dynamics and Neuroscience Conf., Asilomar, CA
Symposium speaker, Annual Mtg, American Soc. Photobiology, Burlingame, CA
July 2008 Workshop lecture, FASEB conf. on DNA palindromes...structurally ambivalent DNA
September 2008 Plenary Lecture, Brazilian Genetics Congress, Salvador, Brazil
May 2009 Keynote Lecture, 11th Annual Midwest DNA Repair Symposium, Ann Arbor, MI
June 2009 Keynote Lecture, Symp. on DNA Repair and Human Health, Ctr for Integrative Genetics, Lausanne, Switzerland
Co-Chair and Speaker, 15th International Congress on Photobiology Dusseldorf, Germany
August 2009 Session Co-Chair/Speaker, Gordon Conference on Genetic Toxicology, New London, NH
Keynote Lecture, 10th Int. Conference on Environmental Mutagens, Firenze, Italy
September 2009 Session Chair/Speaker, Int. workshop on Cockayne syndrome, Boston, MA
Speaker, Special symposium in honor of R.B. Setlow, Brookhaven Nat. Labs, NY
October 2009 Short course lectures on Genomic Maintenance, Deep Springs College, CA
Plenary speaker, and Symposium Chair/speaker, EMS Annual Meeting, St. Louis, Mo.
November 2009 Speaker, 40th Int. Symp. of the Princess Takamatsu Cancer Research Fund, Tokyo
January 2010 Seminar, University of California, Berkeley
February 2010 Seminar, University of Florida, Gainesville
March 2010 Seminar, Eppley Institute for Cancer Research, Univ. Nebraska, Omaha

April 2010 Seminar, National Cancer Institute, NIH, Bethesda
 May 2010 Plenary Lecture, Banbury Center Workshop on "Mutagenesis: What it means and how it has changed.", Cold Spring Harbor, NY
 July 2010 Keynote Lecture, Russian-Swiss Workshop on "Regulation of genome stability by DNA replication and repair", Saint Petersburg, Russia
 September 2010 Speaker, Plenary session on "Oxidative stress, DNA damage, repair and biological consequences", 9th Int. Soc. for Study of Xenobiotics Meeting, Istanbul, Turkey
 September 2010 Speaker on "Causes and consequences of arrested transcription", Annual Cell/Molecular Biology Retreat, Stanford University, CA
 October 2010 Plenary Speaker, ALAMCTA Meeting, Santiago, Chile
 Symposium Co-Chair, EMS Annual Meeting, Fort Worth, TX
 November 2010 Keynote Lecture, Mexican Soc. Biochemistry, Puxtia Gutierrez, Chiapas, Mexico
 April 2011 AACR – Princess Takamatsu Lectureship, Orlando, FL
 October 2011 Symposium speaker on "Transcription blockage by lesions and unusual DNA structures" Annual Mtg of the EMS, Montreal, Quebec, Canada
 January 2012 Seminar, "Benchmarks in the History of DNA Repair", University of California, Riverside, CA
 June 2012 1st Session Chair and Speaker, 7th Int. Conf. on Unstable Satellites and Human Disease, Mont St. Odile, Strasbourg, France
 June 2012 Seminar, Centre de Recherche en Cancerologie, Marseille, France
 June 2012 Keynote Speaker, 3rd Erling Seeberg Symposium on DNA Repair, Trondheim, Norway
 July 2012 Seminar, Universiti Tunku Abdul Rahman, Kampar, Malaysia
 October 2012 Honors Program Seminar, NYU School of Medicine, New York
 October 2012 Seminar, Center in Molecular Toxicology, Vanderbilt University, Nashville, TN
 November 2012 Seminar, University of Buenos Aires, Argentina
 November 2012 Plenary Lecture, XV Congreso Latinoamericano de Genetica, Rosario, Argentina
 May 2013 Speaker, Symposium on "50 years of DNA Repair at Yale", New Haven, CT
 November 2013 Plenary Lecture, 11th Int. Conf. on Environmental Mutagens, Iguassu, Brazil
 September 2014 Keynote Lecture in Opening Session, 16th International Congress on Photobiology, Cordoba, Argentina
 January 2015 Keynote Lecture, Gordon Research Seminar on Mammalian DNA Repair, Ventura
 May 2015 First Biennial Smerdon/Reeves Chromatin-DNA Repair Lecture, Washington State University, Pullman WA
 June 2015 Lecture, The Tomas Lindahl Conference on DNA Repair, Holmenkollen, Norway
 2016 Keynote Lecture, Gordon Res. Conf. on DNA damage, mutations and cancer
 2016 Keynote Lecture, Toxicology Division, American Chemical Society Nat. Mtg., Philadelphia, PA
 2016 Keynote Lecture, ALAMCTA Congress, Montevideo, Uruguay
 2017 Invited presentation, Cold Spring Harbor Mtg. on "Mechanisms of Eukaryotic Transcription"
 2017 Lecture at Hanawalt research group reunion, Asilomar, CA
 2017 Seminar, University of Texas, Southwestern Medical Center, Dallas, TX
 2017 Lecture in special symposium in my honor, after EMGS annual meeting, Raleigh, NC
 2017 Closing Keynote lecture, 6th Europe-U.S. DNA Repair Conference, Udine, Italy
 2018 Opening lecture in symposium honoring Susan Wallace, Burlington, VT
 2018 Seminar, Panum Institute, University of Copenhagen, Copenhagen, Denmark
 2018 Seminar, Univ Texas, Southwestern Med.Ctr., Dallas, TX
 2019 Lecture, Gordon Research Conference on Mammalian DNA Repair, Ventura, CA
 2019 Lecture in symposium honoring Thomas Kunkel, NIEHS, North Carolina
 2019 Lecture in symposium honoring Paul Modrich, Washington, DC
 2019 Lecture in 50th anniversary of EMGS, and symposium Co-chair, Washington, DC
 2019 Keynote lecture, Nikolay Tomilin memorial symposium, St. Petersburg, Russia

XII Research Support (AEC/ERDA/DOE contract 1962-1987; NIH grants 1962-1987; American Cancer Society grants 1981-1987) Support from 1987 listed below:

2R01-CA77712

Hanawalt (PI)

04/01/09 – 06/30/18

Role of Transcription in Genomic Stability

We characterized unique features of transcription complexes encountering different impediments; non-canonical DNA structures, guanine-rich sequences, strand breaks and other lesions, to reveal

signals for initiating TCR and possible “gratuitous” repair. These studies will hopefully provide clues for innovative approaches in chemotherapy for cancer, including the generation of stable R-loops in unique active genes in tumor cells to render the very act of transcription “toxic” in those cells.

1R01-ES018834 Hanawalt (PI) 04/01/10 – 09/30/15

Oxidative DNA damage processing; role in human pathology and aging

We developed novel techniques for elucidating effects of oxidative DNA lesions on transcription, and for repair analysis at physiologically relevant levels in transcriptionally active and silent genomic domains. This included an ultrasensitive comet-FISH approach with strand-specific probes to reveal transcription-coupled repair of 8-oxo-guanine in human cells.

R01 CA77712 Hanawalt (PI) 04/01/03-03/31/09.

Role of RNA Polymerase II in DNA Repair

Characterization of translocating RNA polymerases at site-specific DNA lesions *in vitro*; Effects of transcription factors (eg. TFIIS); comparative analysis with TCR *in vivo*.

R01 CA90915 Hanawalt (PI) 01/28/02-12/31/08

Transcription-coupled DNA Repair and Human Disease

Comparative studies of TCR in cells from Cockayne syndrome and UV-sensitive syndrome with respect to different genotoxic exposures, including reactive oxygen species. Genetic analyses of these diseases.

RO1 CA91456 Hanawalt (PI) 01/28/02-12/31/08

Transcription-coupled DNA Repair in *E. coli*

Role of RNA polymerase in TCR, including TCR with T7 RNA polymerase. Studies on thymineless death and roles of RecA, RecQ and other enzymes in processing arrested replication forks.

AG-SS-0550-00 Hanawalt (PI) 01/01/01-12/31/04

Ellison Medical Foundation Sr. Scholar Award : DNA Repair in Human Neurons

5R 35 CA44349 Hanawalt (PI) 06/01/87-11/30/01

Outstanding Investigator Grant : Cellular Processing of Damaged DNA; Role in Oncogenesis

NIH/Fogarty International Research Collaboration Award (FIRCA)

Domain Organization of DNA Repair in Human Cells

R03 TW001385-03 Hanawalt (PI) 06/01/00-08/31/03

XIII. Personal Data

Born: August 25, 1931 (Akron, Ohio)

Early years: Home in Midland, Michigan

Married: Joanna Thomas, 1957- div.1977; Graciela Spivak, 1978 -

Children: David 61, Steve 59, Alex 40, Lisa 37

Residence: 317 Shasta Drive, Palo Alto, CA 94306-4542

Work: Department of Biology, 371 Jane Stanford St, Stanford University, CA 94305-5020

Email: hanawalt@stanford.edu ; Homepage: <http://www.stanford.edu/~hanawalt>

Avocations: Skiing, Kayaking/Canoeing, Hiking/Camping, Ballroom Dancing, Woodworking, Reading and Travel

High School Activities: Scouting (Eagle scout); Michigan All-State Band (flute/piccolo); Electronics projects (Hon. Mention, Westinghouse Nat. Science Talent Search, 1949); Oratory (Michigan regional debate winner, 1949); Varsity tennis team, 1946 -1948.
