## EDUCATION

### Stanford University

Ph.D. in Geological and Environmental Sciences Expected 2019  
Advisors: Gordon E. Brown, Jr. and Kate Maher  
Thesis: Thermodynamic Controls on Redox-Driven Kinetic Stable Isotope Fractionation

### Princeton University

A.B. *summa cum laude* in Chemistry 2014  
Certificate in Ancient Roman Language and Culture  
Advisor: Satish C. B. Myneni  
Thesis: Halogenation of Organic Matter along Climate and Salinity Gradients

## HONORS AND AWARDS

**National Science Foundation Postdoctoral Fellowship** 2019-2021  
Awarded to 8-10 fellows per year

**Harriet Benson Fellowship** 2018  
Awarded to two graduate students annually in Geological Sciences at Stanford University

**National Defense Science and Engineering Graduate Fellowship** 2014-2017  
Provides tuition and a stipend for three years of graduate study

**Anne T. and Robert M. Bass Stanford Graduate Fellowship** 2014-2019  
Provides tuition and a stipend for three years of graduate study

**Princeton University Robert Thornton McCay Prize for Physical Chemistry** 2014  
Awarded to two seniors in Chemistry

**Princeton University Shapiro Prize for Academic Excellence** 2011-2012  
Awarded to fifty juniors for exceptional academic performance during sophomore year

### SELECTED PRESENTATIONS

**Joe-Wong, C.**; Weaver, K. L.; Brown, S. T.; Maher, K. “Thermodynamic Controls on Kinetic Stable Isotope Fractionation: Chromium(VI) Reduction by Iron(II).” Oral session at Goldschmidt Conference, Boston, Massachusetts, August 2018.

**Joe-Wong, C.**; Weaver, K. L.; Brown, S. T.; Maher, K. “Applications of Marcus Theory to Stable Metal Isotope Fractionation during Redox Reactions.” Oral session at Goldschmidt Conference, Paris, France, August 2017.

**Joe-Wong, C.**; Maher, K.; Brown, Jr. G. E. “Chromium(VI) Reduction by Mixed Fe(II/III)-Bearing Clay Minerals.” Oral and poster session at ACS, Philadelphia, Pennsylvania, August 2016.

### RESEARCH EXPERIENCE

**Redox Kinetics and Thermodynamics of Iron(II)-Bearing Clay Minerals** 2015-present

- Quantified kinetics of chromium(VI) reduction by iron(II)-bearing clay minerals in anaerobic conditions
- Determined products of chromium(VI) reduction using X-ray absorption spectroscopy
- Experimentally and theoretically characterized chromium isotope fractionation during chromium(VI) reduction

**Redox-Driven Kinetic Stable Isotope Fractionation** 2015-present

- Characterized chromium isotope fractionation during chromium(VI) reduction by organically ligated aqueous iron(II) species
- Developed thermodynamic framework for redox-driven kinetic stable isotope fractionation

**Fracture and Matrix Geochemistry and Geomechanics** 2014-2015

- Investigated interactions of fracking fluid with iron-bearing minerals (*e.g.*, pyrite)

**Effects of Climate and Sea Level Rise on Halogen Cycling** 2011-2014

- Studied interactions of natural organic matter with bromine and chlorine
- Awarded \$6000 by the Princeton Environmental Institute, \$4000 by the Princeton University Fred Fox '39 Fund, and \$1500 from the Office of the Dean of the College

**Addition of Ferrihydrite to Stimulate Iron and Uranium Bioreduction** 2013

- Investigated microbial reduction and immobilization of soluble uranium in groundwater upon stimulation by poly(acrylic acid)-coated ferrihydrite

**Estimation of Thiol Concentrations in Aqueous Natural Samples** 2011-2012

- Developed novel method based on fluorescence spectroscopy to estimate thiol concentrations in aqueous natural samples

**LEADERSHIP AND TEACHING EXPERIENCE****Maher Laboratory Manager** 2017-present

- Trained new personnel
- Developed safety protocols
- Coordinated labwork and supplies for 4 or more students

**Teaching Assistant, GS 170/270: Environmental Geochemistry** Winter 2016-2017

- Guest lectured on chromium in the environment
- Graded problem sets

**Peer Tutor, General and Organic Chemistry** 2012-2014

- Tutored undergraduate students one-on-one who were at risk of failing the course

**SERVICE**

- Reviewer for *Environmental Science and Technology*, *Chemical Geology*, *Analytical and Bioanalytical Chemistry*
