

- Christopher P. Cheng, Ph.D. -
Address: 1731 Holt Ave, Los Altos, CA 94024
Cell: (650) 799-6338, E-Mail: cpc@stanford.edu

Summary

- Executive management, R&D, business development, preclinical/clinical studies, regulatory strategy, sales training
- Expertise in biomechanics, medical imaging, FEA, geometric modeling, statistics, epidemiology, anatomy/physiology
- Implant design, delivery system design, Nitinol, manufacturing & processing techniques, V&V evaluations
- Extensive experience with FDA regarding biomechanics, mechanical testing, simulation, animal testing, MRI safety
- Author of 25+ patents, patent applications, and invention disclosures
- Advising of undergraduates, doctoral, and post-doctoral students; grant writing, teaching
- Author of 35+ journal, 55+ conference, 2 book chapters publications; Seasoned podium presenter and invited speaker
- Fundraising of \$15.80M, with \$3.11M as Principal Investigator

Education

Stanford University	Stanford, CA	Ph.D. , 2002 Mechanical Engineering (Biomechanical Engineering Division)
Stanford University	Stanford, CA	M.S. , 2000 Mechanical Engineering (Biomechanical Engineering Division)
Duke University	Durham, NC	B.S.E. , 1998 Biomedical Engineering and Electrical & Computer Engineering
University of Oxford	Oxford, UK	Study abroad in Economics and International Markets, 1996

Professional History

- 2018 – Present** • **Global Science & Technology, Inc.**
Vice President, Medical Division
- Responsible for Medical Division emphasizing consulting with medical device companies and service contracts with government agencies involved with healthcare
- 2006 – Present** • **Stanford University, Department of Surgery**
Adjunct Professor (2017 – Present)
Consulting Professor (2016 – 2017)
Consulting Associate Professor (2012 – 2015)
Consulting Assistant Professor (2006 – 2011)
- Director of Vascular Interventional Biomechanics & Engineering (VIBE) Lab – biomechanical interactions between cardiovascular system and vascular devices using medical imaging, geometric modeling, and computational methods
 - Masters Thesis, Doctoral, and Post-Doctoral advisees: Johan Bondesson (2017-), Max Frohlich (2017-), David Zhu (2015-16), Kelsey Hirotsu (2014-16), Brian Liu, M.D. (2012-2014), Ga-Young Suh, Ph.D. (2011-14), Adam Tenforde, M.D. (2006-2010), Gilwoo Choi, Ph.D. (2005-2009)
- 2002 – Present** • **MD CTO Consulting, LLC**
Owner
- Consulting for medical imaging, anatomy/physiology, biomechanics, engineering testing, device design, regulatory
- 2018** • **University of Oxford, Exeter College, Vascular Surgery, and Cardiovascular Medicine**
Visiting Fellow at Exeter College and Expert-in-Residence for Medical Research Council
- Organized symposiums about medical entrepreneurship, research collaborations, writing book on vascular motion
- 2012 – 2017** • **Kōli, Inc.**
Co-Founder and CEO
- Minimally-invasive treatment for gallstone disease
 - Led company from founding to enrollment of first clinical trial
 - Principal Investigator for NSF SBIR Phase I, IB, II, II-REU, II-CAP, II-TECP, II-CC, II-SECO awards
- 2011 – 2012** • **Nitinol Devices & Components**
Entrepreneur in Residence
- Emerging opportunities
- 2011** • **Tendyne Medical, Inc.**

General Manager

- Minimally-invasive treatment for mitral regurgitation

2007 – 2010

• NovoStent Corporation

Director of Technology

- Directed end-to-end R&D for peripheral vascular stent platform
- Led stent R&D efforts to achieve clinical trial approval, CE-Mark, and establish FDA pre-IDE requirements

2005 – 2007

• Johnson & Johnson, Nitinol Devices & Components and Cordis Corporation

Principal Engineer/Program Manager

- Founder and director of Cordis Biomechanics Group
- Cardiovascular device design for Advanced Device Concepts Group

2002 – 2005

• Stanford University, Departments of Mechanical Engineering, Pediatrics, and Radiology

Research Associate

- Hemodynamic quantification at rest and during exercise for peripheral vascular disease and congenital heart disease
- RESISStent Program: Consortium with medical device industry to describe the superficial femoral artery environment

1998 – 2002

• Stanford Cardiovascular Biomechanics Lab

Ph.D. Student

- Quantification of hemodynamic conditions in the human abdominal aorta at rest and during exercise

1995 – 1998

• Internships and Academic Research

- Neural network software development for Global Science & Technology, Inc.
- Mechanism design for 2nd and 3rd Servicing Missions of the Hubble Space Telescope for Swales Aerospace/NASA
- Orthopedic biomechanics research for Duke Orthopedics Biomechanics Lab

Board Memberships

- Corporate Boards: Kōli, Tendyne Medical, The Power Rank
- Scientific Advisory Boards: 480 Biomedical
- Non-Profit Boards: East Palo Alto Boxing Club

Awards and Honors

- Medical Research Council, Expert-In-Residence, University of Oxford (2018)
- Fannie Mitchell Expert-In-Residence, Duke University (2015)
- Standards of Leadership Award, Johnson & Johnson (2006)
- Whitaker Fellow, The Whitaker Foundation (1998-2002)
- First Place of Ph.D. competition at ASME Summer Bioengineering Conference (2001)

Other Accomplishments & Skills

- *Boy Scouts of America* – Eagle Scout with Gold Palm; Order of the Arrow
- *Martial Arts* – Black Belt in Tang Soo Do; Kung-Fu training at The Shaolin Temple of China; Boxing
- *Foreign Language* – Fluent in Mandarin Chinese
- *Wine/Enology* – Certified Specialist of Wine (CSW) through the Society of Wine Educators; Technical advisor for Martin Reyes' Master of Wine research paper; Wine producer, lecturer, consultant, buyer, and judge; Founder and lecturer of Stanford Viticulture Course and Stanford Wine Club

Journal Publications

In Preparation

- **Cheng CP**, “Dynamic Blood Vessels and Implications for Medical Devices,” *Journal of NDS*
- Suh G, Ullery BW, Hirotsu K, Lee JT, Fleischmann D, Dake MD, **Cheng CP**, “Cardiopulmonary-Induced Deformations of the Thoracic Aorta Following Thoracic Endovascular Aortic Repair,” *Vascular*
- **Cheng CP**, Suh G, Kim JJ, Holden A, “Cardiac- and Respiratory-Induced Deformations of the Renal Arteries and Stents and Relative Compliance Damping After Snorkel Endovascular Aneurysm Sealing”
- **Cheng CP**, Suh G, “Quantification of Abdominal and Thoracic Aortic Geometric and Motion Changes After Endovascular Repair,” *Open Journal of Cardiovascular Surgery*

Published

- 1) Itoga N, Suh G, **Cheng CP** (2018) “Stabilization of the Abdominal Aorta During the Cardiac Cycle with the Sac-Anchoring Nellix Device,” *Annals of Vascular Surgery*, available online

Funding

- Grant from UK Medical Research Council, "Expert in Residence from Silicon Valley"

Role: Expert in Residence	£18,000 (\$25,000)	2018
---------------------------	--------------------	------
- Research grant from *Medical Device Manufacturer*, "Biomechanical Analysis of the Ascending Aorta ..."

Role: PI	\$60,000	2016-2018
----------	----------	-----------
- Research grant from *Medical Device Manufacturer*, "Geometry and Deformation of the Thoracic Aorta Before and After TEVAR"

Role: PI	\$75,000	2017
----------	----------	------
- Research grant from *Medical Device Manufacturer*, "Biomechanical Analysis of the Complex Endovascular Aortic Repair with the ... Device"

Role: PI	\$100,000	2016-17
----------	-----------	---------
- Research grant from *Medical Device Manufacturer*, "Biomechanical Analysis of the ... Device with Chimney/Snorkel Branches in Patients"

Role: PI	\$105,000	2016-17
----------	-----------	---------
- NSF SBIR Phase II #IIP-1353584, "A Medical Device to Treat Gallstone Disease"

Role: PI	\$1,312,000	2014-2017
Phase II Award	\$736,000	2014-2017
Commercialization Assistance Program	+\$10,000 Supplement	2014
Research Experiences for Undergraduates	+\$16,000 Supplement	2015
Technology Enhancement for Commercial Partnerships	+\$147,000 Supplement	2015
Research Experiences for Undergraduates	+\$16,000 Supplement	2016
Partnership with Community Colleges	+\$40,000 Supplement	2016-2017
Diversity Post-doctoral Fellowship	+\$200,000 Supplement	2016-2017
Small Business / ERC Collaborative Opportunity	+\$147,000 Supplement	2017
- Research grant from Endologix Inc., "Biomechanical Analysis of ... Endovascular Aortic Repair"

Role: PI	\$48,000	2015
----------	----------	------
- Research grant from W.L. Gore & Associates, "Biomechanical Influences of ... on the Thoracic Aorta"

- | | | | |
|--|----------|-----------|-----------|
| | Role: PI | \$300,000 | 2013-2015 |
|--|----------|-----------|-----------|
- NSF SBIR Phase I #1248295, “A Medical Device to Treat Gallstone Disease”

	Role: PI	\$150,000	2013
	SBIR IB, Outside Investment and NSF Match	+\$90,000 Supplement	2013
- Research grant from Medtronic Vascular, “Geometric Deformations of the Thoracic Aorta and Arch Branches Due to Respiration and Cardiac Pulsatility”

	Role: PI	\$297,000	2011-2013
--	----------	-----------	-----------
- Research grant from W.L. Gore & Associates, “Visceral Artery Motion Due to Respiration”

	Role: PI	\$150,000	2012
--	----------	-----------	------
- Research grant from Medtronic Vascular, “Quantification of Renal, Super Mesenteric, and Celiac Artery Geometry and Respiratory-Induced Deformation in Healthy Subjects and Patients with AAA”

	Role: PI	\$189,000	2010-2011
--	----------	-----------	-----------
- NIH # P50 HL083800, “AAA: STOP, Abdominal Aortic Aneurysms: Simple Treatment or Prevention”

	Role: Co-Investigator	\$12,000,000	2005-2009
--	-----------------------	--------------	-----------
- Research grant from Cordis Corporation, “Abdominal Aortic Deformations Due to Musculoskeletal Motion”

	Role: PI	\$200,000	2005-2007
--	----------	-----------	-----------
- RESIStent SRI/Stanford Consortium on Stent Fracture in the Superficial Femoral Artery

	Role: Co-Investigator	\$690,000	2003-2005
--	-----------------------	-----------	-----------
