

- Christopher P. Cheng, Ph.D. -
Cell: (650) 799-6338, E-Mail: winecpc@gmail.com

Summary

- Entrepreneur, executive, board member, investor, R&D leader, academic-corporate partnerships, business development
- Expertise in biomechanics, medical imaging, FEA, statistics, anatomy/physiology, medical device design, preclinical/clinical studies, regulatory strategy, Nitinol, manufacturing, verification & validation
- Government contracting for aerospace industry (NOAA, NASA, DoD); Top secret US government clearance
- Author of 25+ patents, patent applications, and invention disclosures
- Advising of undergraduate, master's, doctoral, and post-doctoral students; grant writing, teaching
- Author of 50+ journal, 70+ conference, 1 book, 17 book chapter publications, PROSE book award nominee
- Seasoned conference/session organizer, podium presenter, and invited speaker
- Grant funding of \$16.805M, with \$4.115M as Principal Investigator
- Board member of Duke University Pratt School of Engineering and American Leadership Forum (Silicon Valley)

Education

Stanford University	Stanford, CA	Ph.D. Mechanical Engineering (2002)
Stanford University	Stanford, CA	M.S. , Mechanical Engineering (2000)
Duke University	Durham, NC	B.S.E. , Biomedical and Electrical & Computer Engineering (1998)
University of Oxford	Oxford, UK	Visiting Student in Economics and International Markets (1996)

Professional History

- 2018 – Present** **Global Science & Technology, Inc.**
President/CEO (2020 – Present)
Vice President, Medical Division (2018 – Present)
- Government contracting for NOAA, NASA, DoD, state & local; earth science, remote sensing, outreach, IT
 - Cardiovascular biomechanics and device durability consulting for the medical device industry
- 2006 – Present** **Stanford University, Department of Surgery**
Adjunct Professor (2017 – Present)
Consulting Professor (2016 – 2017)
Consulting Associate Professor (2012 – 2015)
Consulting Assistant Professor (2006 – 2011)
- Director of Vascular Intervention Biomechanics & Engineering (VIBE) Lab – Study biomechanical interactions between cardiovascular system and medical devices using imaging, geometric modeling, and quantification methods
- 2019 – Present** **Cardiovascular Implant Durability Inc.**
Founder and President
- Non-profit dedicated to understanding and improving mechanical durability of cardiovascular devices
- 2019 – Present** **Reyes Wine Group, LLC**
Business and Technical Advisor
- Advisor to the owner on business development, consumer purchasing behavior, climate change
- 2018** **University of Oxford**
Visiting Fellow/Professor
- Sabbatical – Visiting Fellow at Exeter College, Visiting Professor in Vascular Surgery and Cardiovascular Medicine
 - Wrote *Handbook of Vascular Motion*, organized symposium series on medical entrepreneurship, research
- 2002 – 2018** **MD CTO Consulting, LLC**
Owner
- Consulting for medical imaging, anatomy/physiology, biomechanics, engineering testing, device design, regulatory
- 2012 – 2017** **Kōli, Inc.**
Co-Founder and CEO
- Minimally-invasive treatment for gallstone disease; led company from founding to first-in-human trial
 - Principal Investigator for NSF SBIR Phase I, IB, II, II-REU, II-CAP, II-TECP, II-CC, II-SECO awards
- 2011 – 2012** **Nitinol Devices & Components**

Entrepreneur in Residence

- Emerging opportunities

2011 Tendyne Medical, Inc. General Manager

- Minimally-invasive treatment for mitral regurgitation

2007 – 2010 NovoStent Corporation Director of Technology

- Directed end-to-end R&D for peripheral vascular stent platform
- Led stent R&D efforts to achieve clinical trial approval, CE-Mark, and establish FDA pre-IDE requirements

2005 – 2007 Johnson & Johnson, NDC and Cordis Principal Engineer/Program Manager

- Founder and director of Cordis Biomechanics Group
- Cardiovascular device design for Advanced Device Concepts Group

2002 – 2005 Stanford University, Mechanical Engineering and Pediatrics Research Associate

- Hemodynamic quantification at rest and during exercise for peripheral vascular disease and congenital heart disease
- RESIStent Program: Consortium with medical device industry to describe the superficial femoral artery environment

1998 – 2002 Stanford Cardiovascular Biomechanics Lab Ph.D. Student

- Quantification of hemodynamic conditions in the abdominal aorta at rest and during exercise (Advisor: Charles Taylor)

1993 – 1998 Internships and Undergraduate Research Intern/Research Assistant

- Global Science & Technology, Inc. – Neural network software development for satellite and weather balloon data
- Swales Aerospace – Mechanism design for 2nd and 3rd Servicing Missions of the Hubble Space Telescope
- Duke Orthopedics Biomechanics Lab – Neck muscle medical image processing and geometric modeling
- NASA Goddard Space Flight Center – Contingency analysis for 1st Servicing Mission of the Hubble Space Telescope

Board Memberships

- Corporate: MedRes (2021-present), GST (2020-present), The Power Rank (2011-present), Kōli (2012-2017), 480 Biomedical (2012-2013), Tendyne Medical (2011-2012)
- Academic: Duke University, Pratt School of Engineering (2018-present)
- Non-Profit: American Leader Forum – Silicon Valley (2021-present), Cardiovascular Implant Durability (2019-present), East Palo Alto Boxing Club (2012-2016)

Awards and Honors

- *Handbook of Vascular Motion* nominated by Elsevier for PROSE book award (2019)
- Best Paper Award at American Association of Wine Economists Conference (2019)
- Medical Research Council, Expert-In-Residence, University of Oxford (2018)
- Fannie Mitchell Expert-In-Residence, Duke University (2015)
- Standards of Leadership Award, Johnson & Johnson (2006)
- First Place of Ph.D. competition at ASME Summer Bioengineering Conference (2001)
- Whitaker Fellow, The Whitaker Foundation (1998-2002)

Other Accomplishments & Skills

- *Boy Scouts of America* – Eagle Scout with Gold Palm; Order of the Arrow
- *Martial Arts* – Black Belt in Tang Soo Do; Kung-Fu training at The Shaolin Temple of China; Boxing
- *Foreign Language* – Fluent in Mandarin Chinese
- *Wine* – Certified Specialist of Wine (CSW) through the Society of Wine Educators; Technical advisor for Martin Reyes' Master of Wine research paper; Wine producer, lecturer, consultant, buyer, and judge; Founder and lecturer of Stanford Wine Club and Stanford Viticulture Course

Journal Publications

In Preparation

- Kwiecinski J, Uberoi R, Mohammed H, **Cheng CP**, You Z, “*In Vitro* Quantification of Stent-Graft Behavior During ch-TEVAR,” *Journal of Vascular and Interventional Radiology*, submitted
- Ullery BW, Kim JJ, Suh G, Lee JT, Dalman RL, **Cheng CP**, “Impact of Renal Chimney Intra-aortic Stent Length on Branch and End-stent Angle in Chimney Endovascular Aneurysm Repair and Endovascular Aneurysm Sealing Configurations,” *Vascular*, submitted
- Lee S, Karla K, Redpath B, Bernheim A, Little B, Brewster L, Shaw L, Arya S, “Evaluation of Peripheral Calcium Score as a Measure of Peripheral Arterial Disease Burden and Amputation Risk,” in preparation

Published

- 1) Bondesson J, Suh G, Dake MD, Lee JT, **Cheng CP** (2021) “Influence of Thoracic Endovascular Aortic Repair on True Lumen Helical Morphology in Type B Dissections,” *Journal of Vascular Surgery*, accepted

Grant Funding

- Research grant from *Medical Device Manufacturer*, "Biomechanical Analysis of Fenestrated EVAR with ..."
Role: PI \$109,000 2021-22
- Research grant from Starlight Cardiovascular, "Biomechanical Analysis of Single Ventricle Disease to Assist with Ductus Arteriosus Stent and Pulmonary Artery Flow Restrictor Design and Durability Evaluation"
Role: PI Phase I: \$60,000 2020-21
 Phase II: \$90,000 2021-22
- Research grant from *Medical Device Manufacturer*, "Biomechanical Analysis of the Ascending Aorta After Dissection TEVAR Treatment"
Role: PI \$715,000 2019-21
- Research grant from *Medical Device Manufacturer*, "Biomechanical Analysis of Fenestrated EVAR with ..."
Role: PI \$100,000 2019-20
- Grant from UK Medical Research Council, "Expert in Residence from Silicon Valley"
Role: Expert in Residence £18,000 (\$25,000) 2018
- Research grant from *Medical Device Manufacturer*, "Biomechanical Analysis of the Ascending Aorta Before and After Type A Dissection Endograft Treatment ..."
Role: PI \$60,000 2016-2018
- Research grant from *Medical Device Manufacturer*, "Geometry and Deformation of the Thoracic Aorta Before and After TEVAR"
Role: PI \$75,000 2017
- Research grant from *Medical Device Manufacturer*, "Biomechanical Analysis of the Complex Endovascular Aortic Repair with the ... Device"
Role: PI \$100,000 2016-17
- Research grant from *Medical Device Manufacturer*, "Biomechanical Analysis of the ... Device with Chimney/Snorkel Branches in Patients"

Role: PI	\$105,000	2016-17
• NSF SBIR Phase II #IIP-1353584, “A Medical Device to Treat Gallstone Disease”		
Role: PI/CEO	\$1,312,000	2014-2017
Phase II Award	\$736,000	2014-2017
Commercialization Assistance Program	+\$10,000 Supplement	2014
Research Experiences for Undergraduates	+\$16,000 Supplement	2015
Technology Enhancement for Commercial Partnerships	+\$147,000 Supplement	2015
Research Experiences for Undergraduates	+\$16,000 Supplement	2016
Partnership with Community Colleges	+\$40,000 Supplement	2016-2017
Diversity Post-doctoral Fellowship	+\$200,000 Supplement	2016-2017
Small Business / ERC Collaborative Opportunity	+\$147,000 Supplement	2017
• Research grant from Endologix Inc., “Biomechanical Analysis of ... Endovascular Aortic Repair”		
Role: PI	\$48,000	2015
• Research grant from W.L. Gore & Associates, “Biomechanical Influences of ... on the Thoracic Aorta”		
Role: PI	\$300,000	2013-2015
• NSF SBIR Phase I #1248295, “A Medical Device to Treat Gallstone Disease”		
Role: PI/CEO	\$180,000	2013
Phase I Award	\$150,000	2013
SBIR IB, NSF Match on outside investment	+\$30,000 Supplement	2013
• Research grant from Medtronic Vascular, “Geometric Deformations of the Thoracic Aorta and Arch Branches Due to Respiration and Cardiac Pulsatility”		
Role: PI	\$297,000	2011-2013
• Research grant from W.L. Gore & Associates, “Visceral Artery Motion Due to Respiration”		
Role: PI	\$150,000	2012
• Research grant from Medtronic Vascular, “Quantification of Renal, Super Mesenteric, and Celiac Artery Geometry and Respiratory-Induced Deformation in Healthy Subjects and Patients with AAA”		
Role: PI	\$189,000	2010-2011
• NIH # P50 HL083800, “AAA: STOP, Abdominal Aortic Aneurysms: Simple Treatment or Prevention”		
Role: Co-Investigator	\$12,000,000	2005-2009
• Research grant from Cordis Corporation, “Abdominal Aortic Deformations Due to Musculoskeletal Motion”		
Role: PI	\$200,000	2005-2007
• RESISStent SRI/Stanford Consortium on Stent Fracture in the Superficial Femoral Artery		
Role: Co-Investigator	\$690,000	2003-2005
